

Survival Quest 3D Documentation

Overview

The **Survival Quest 3D** is thoughtfully developed and user-friendly. Function names are clear, and scripts provide step-by-step guidance. This documentation explains the project folders functions. If you encounter any issues, please contact us at blackrosedevelopers@gmail.com.

Project Structure

1. Art

This folder has five subfolders as below:

- **Animations**

This folder contains a character animation.

- **Materials**

Contains 13 various materials used in the game, which can be customized with different colours or sprites and a physic material as well.

- **Models**

Contains 36 different 3D models. (FBX)

- **Sprites**

Contains 16 UI PNG sprites.

- **Textures**

Contains 6 Ground, Spark and Particles textures (PNG) .

2. Prefabs

The Prefabs folder includes 56 prefabs in seven main categories:

- **Gameplay:** Contains 4 prefabs of player and enemy spawn points that can be used in levels.
- **Nature:** 14 prefabs needed for level design.
- **Objects:** 12 unique prefabs needed in level design.
- **Particles:** 7 unique particle effects with different materials.
- **Resources:** 6 different prefabs that can be collected throughout the gameplay.
- **Weapons:** 8 prefabs of different kinds of weapon like sword, axe and hammer.
- **UI:** 5 Prefabs of the game menus and UI elements.

3. Scenes

- **SampleScene:** the main gameplay

4. Scriptable Objects

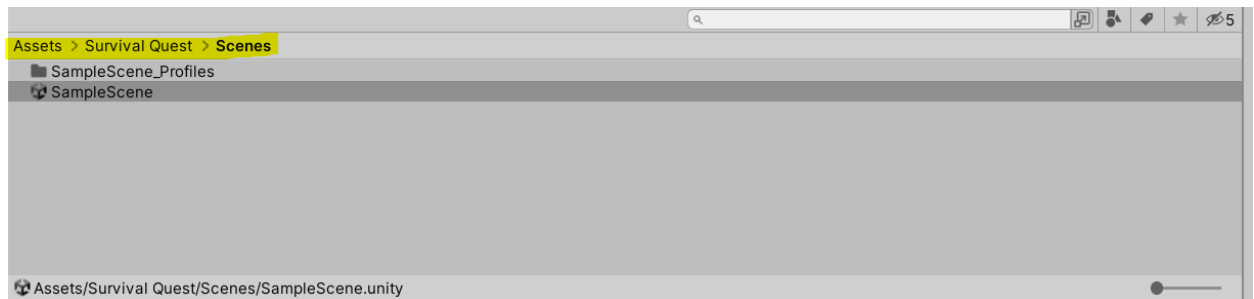

- 9 different scriptable objects ranging from equipment to game data

5. Scripts

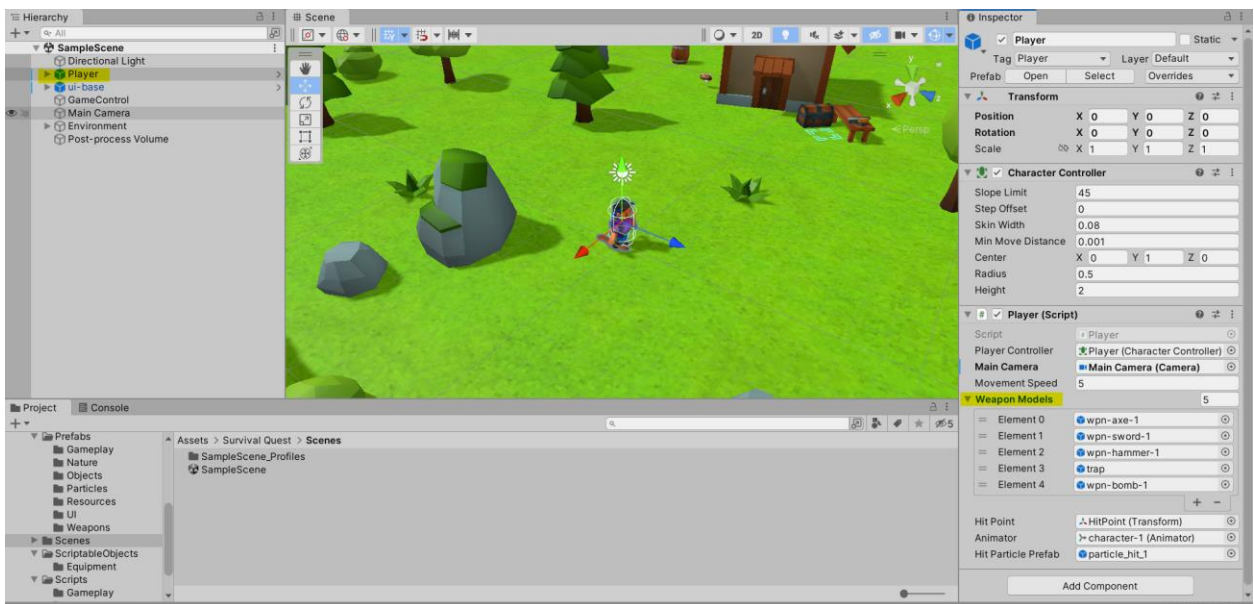

24 Scripts are categorized into three folders, with clear names and functions to ensure easy understanding.

How to setup the scene:

- 1- Navigate to Project – Scenes folder. Find Sample Scene and double click on it to enter the scene.

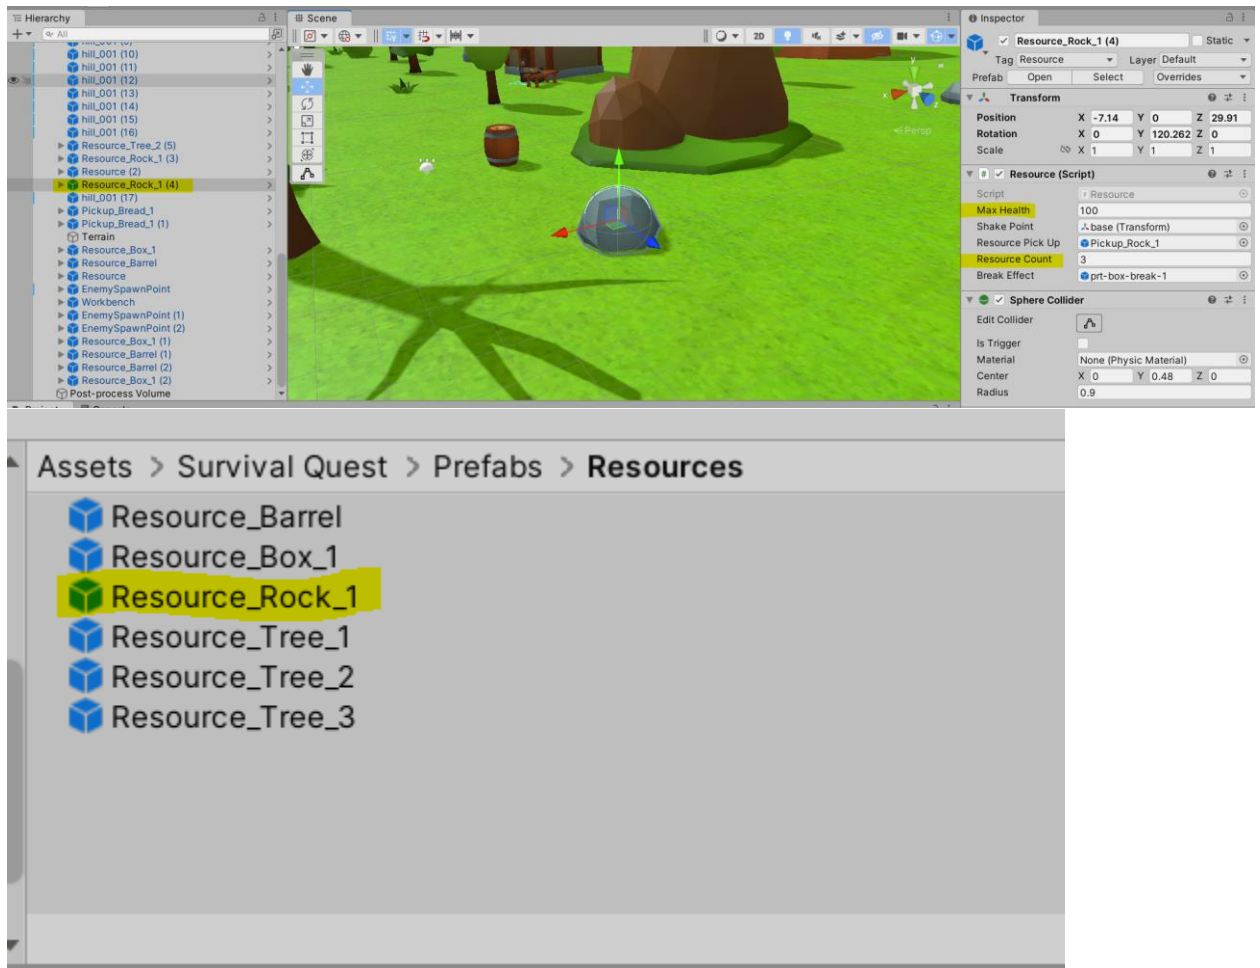

- 2- Find Player prefab in the scene. You can add new weapons and assign it to the prefab. The player position is where the game starts.

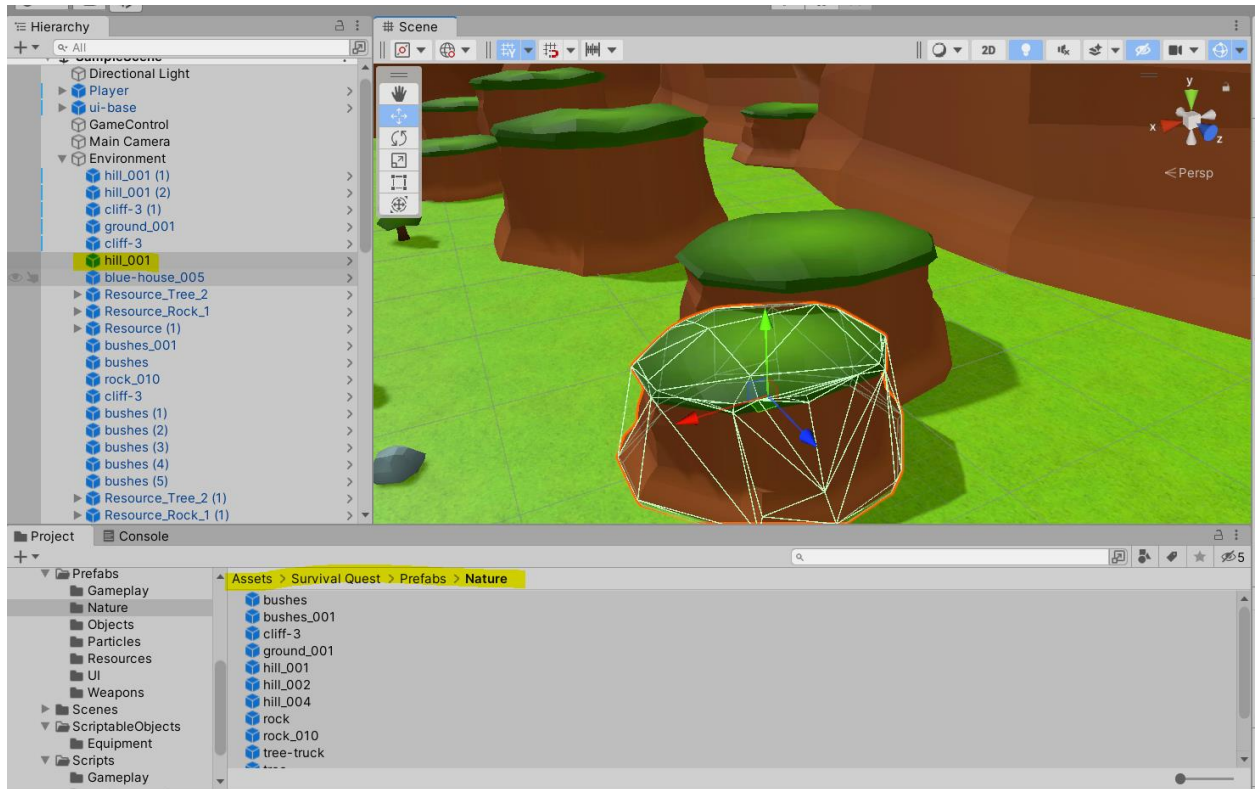

- 3- You can set up your scene by decorating it with prefabs you're your Prefabs folder. Find Environment game object in the scene and you can see all prefabs there. Here let`s check the Resource

Rock prefab which is located in Prefabs- Resources folder. After placing it in the scene, you can set the max health (which will break after damage) and the number of resources it gives away.

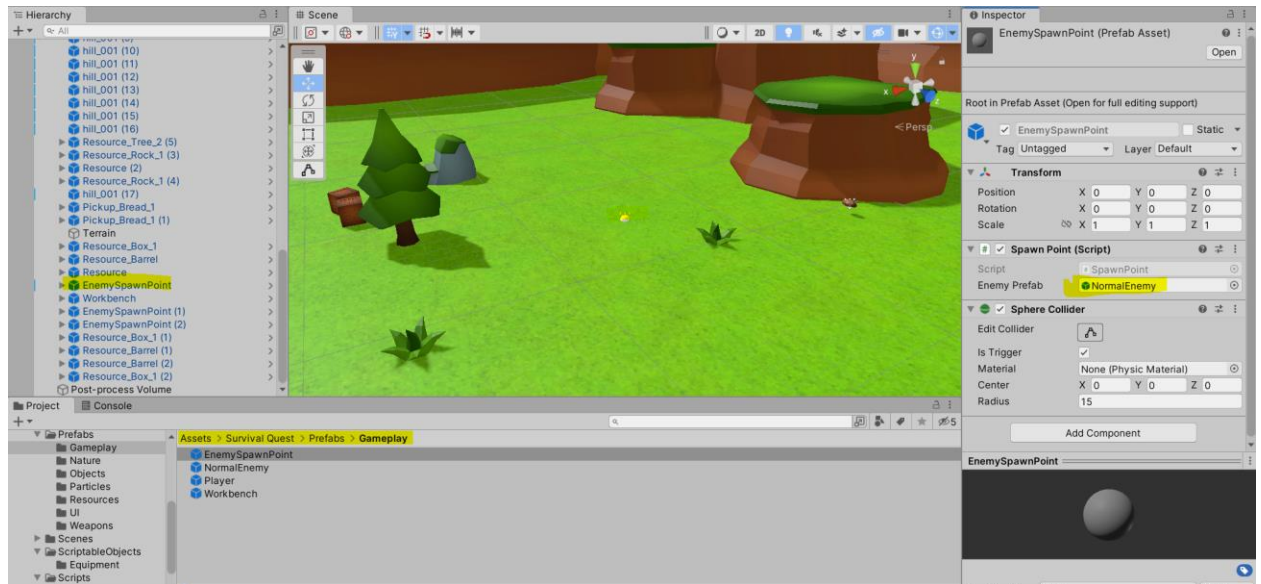

- 4- You can add different prefab in your scene. Here to decorate my scene I added some small hills from prefabs – nature folder.

- 5- As you move on the way, you can add spawn points where enemies emerge. You can find EnemySpawn point prefab from Prefabs – Gameplay folder. After dragging it to your scene, you

need to assign your enemy to it.
